

Local Water Security Assessment

for Improved Water Management
in Selected Countries of the Middle East
and North Africa (MENA) Region

Professor Dr. Slobodan Milutinović

REC Paper • May 2016

Sustainable Use of Transboundary Water Resources
and Water Security Management (Water SUM) Project,
Component 2: Water and Security (WaSe)

This technical report was produced in the framework of the project “Sustainable Use of Transboundary Water Resources and Water Security Management in the MENA region (WaterSUM)”, Component 2: Water and Security. The report assesses local water security for improved water management in selected countries in the Middle East and North Africa region. The countries included in the assessment are Morocco, Algeria, Tunisia, Libya and Egypt in North Africa; and Lebanon, Jordan and Syria in the Middle East.

Local Water Security Assessment

**for Improved Water Management
in Selected Countries of the Middle East
and North Africa (MENA) Region**
